Atom Packages

Recommended Packages

1. atom-beautify
2. atom-ternjs
3. autoclose-html
4. emmet
5. csslint

6. linter

* When you install **linter** it will ask you to install the dependencies for the package, click agree to all and install.
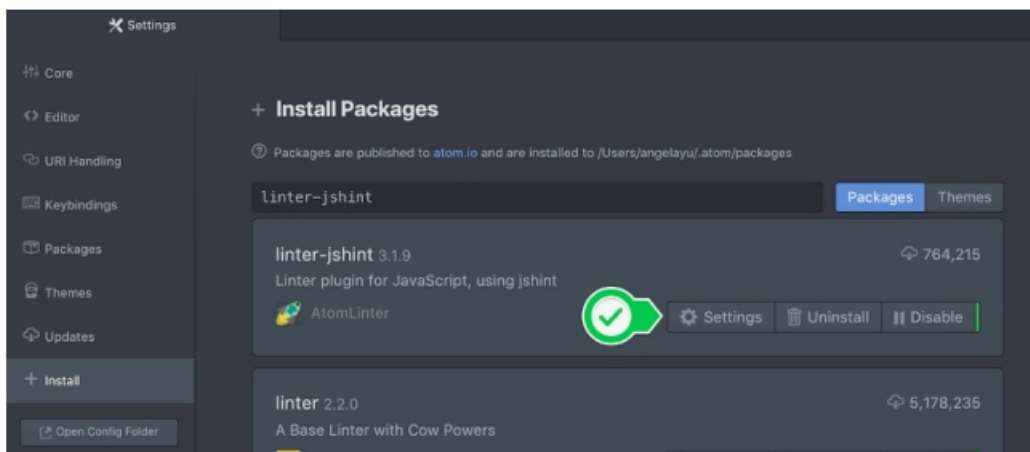

7. linter-jshint

**See below to setup linter-jshint
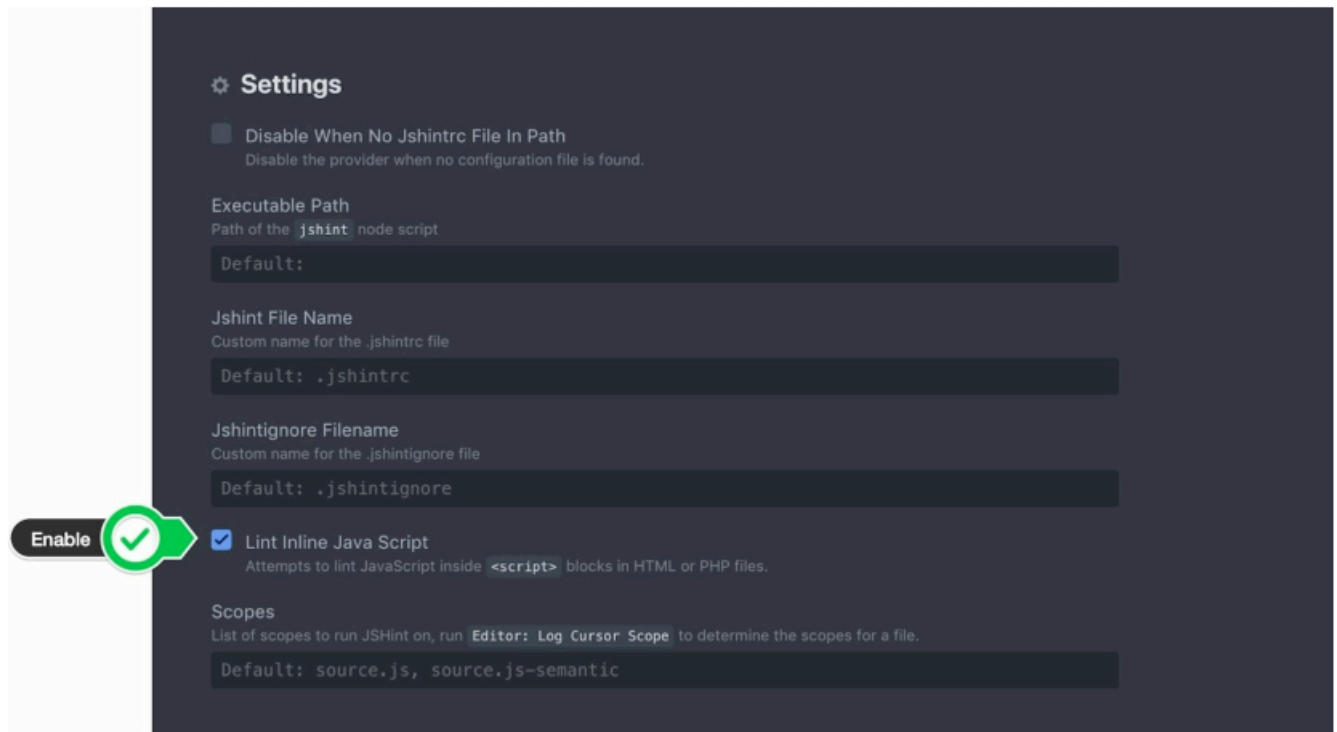

8. pigments
9. language-ejs

Optional Packages

10. atom-html-preview
11. Sublime-Style-Column-Selection
12. linter-eslint

Step 1. After installing **linter-jshint you should head into its settings.

Step 2. On the settings page for **linter-jshint, scroll down and enable the checkbox for "**Lint Inline Java Script**".

Atom Themes

If you want your code to be highlighted in the same colours as mine, be sure to have your Atom theme set as "**One Dark**".
